

MASAMB 2009

19th annual MASAMB workshop
Imperial College London
April 2/3 2009

Division of Molecular Biosciences
Department of Life Sciences
Faculty of Natural Sciences

Call for Abstracts

Abstracts for Talks and Posters are invited for the 19th annual MASAM workshop which will be held at Imperial College London from the 2nd to 3rd of April 2009.

Bioinformatics and statistical genetics, twin themes of the long-running series of annual MASAMB meetings, have gained huge impetus from large-scale genome sequencing projects and development of high-throughput biological assay systems, including gene-expression microarrays, proteomic and metabolomic technologies. These immense data resources, and the underlying complexities of molecular and cell biology, provide exciting research opportunities for numerate scientists.

With typically around 80-100 participants from systems biology, mathematics, statistics, computer science, bioinformatics, biology and related fields, the MASAMB meetings provide an intimate setting for exchange of ideas in methodological and applied research. Research students and scientists newly entering the field of genomic research are particularly welcome.

For more information, submission of abstracts and registration please go to <http://www.bioinformatics.ic.ac.uk/masamb/index.html>

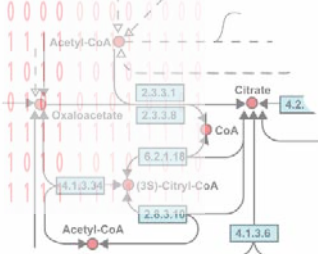

MASAMB 2009 will be preceded by a LICSB (Learning and Inference in Computational Systems Biology) workshop on the 1st and 2nd of April 2009. Details can be found on the MASAMB website.

For any questions please contact MASAMB@imperial.ac.uk

Likely topics for sessions this year

- Analysis and Inference of Biological Networks
- Systems Biology
- Phylogenetics and Comparative Genomics
- Bioinformatics and Functional Genomics

Important dates

Registration opens	December 5th 2008
Abstract submission	January 25th 2009
Author notification	February 2nd 2009
Registration ends	March 1st 2009
Conference	April 2nd-3rd 2009
